Dr. William H. Emerson
115 Westgate Street
Wellesley, Massachusetts

Dear Dr. Emerson:

I shall plan to speak to the Wellesley Radio Amateurs Society, as we discussed at the 3 May meeting. My topic will be "Contemporary Techniques of Communications Through Earth Orbited Satellites". This will cover not only the RF communications aspects but also various satellite control techniques to facilitate such communications.

I will bring some slides and a slide projector. I assume that a movie screen and a blackboard will be available. If either of these is not available, I would appreciate knowing so I may plan accordingly.

Sincerely yours,

F. William Sarles, Jr.
